

 **Ratio**  
SR45X CAGE

## SR45X LINK

Install the SR45X link to extend the B knuckle of your 33t or 36t capacity SRAM AXS derailleur. Used with the SR45X Cage, this will allow the derailleur to be used with a SRAM XPLR cassette.

## SR45X CAGE

Fit the SR45X Cage to your 33t or 36t capacity SRAM AXS derailleur to enable the use of an XPLR cassette, in conjunction with the SR45X Link. Alternatively, use the SR45X Cage as a direct replacement for the cage on your SRAM XPLR derailleur. Follow the correct video for your derailleur model below:
